 - Most current copy on FTCKY Internet
 - <http://www.campbell.army.mil/envdiv/>
- Please Recycle the Old Handbook

Environmental 101

- Protocol Sheets
 - How to update or make suggestions
 - Contact Environmental Education with suggestion
- Phone/Contact List
- CIP Checklist
- Cam Reg 200-1

CBRN DETECTOR/DECON KITS

M256, M256A1, M291, M291A2, M258, M258A1, M72A2, M58A1, M295

POSSIBLE AREAS OF CONCERN

Contaminants of concern in the kits represent possible flammable and toxic hazards. Refer to MSDS for specific use and handling procedures.

CHARACTERIZATION

The refill kit, when disposed of, is a **hazardous waste** for ignitability and toxicity.

HANDLING PROCEDURES

- Step 1** Contact Environmental Division Hazardous Waste to establish a Satellite Accumulation Point (SAP) for hazardous waste.
- Step 2** Unit will be issued a container for kits.
- Step 3** When SAP container is full, contact PPOC for appointment.
- Step 4** Take container to PPOC at scheduled appointment time. Unit will be required to segregate kits by type.
- Step 5** Bring chain of custody (Part 6) of 6 part folder when turning in. PPOC personnel will sign showing acceptance.

CBRN Detector/ Decon Kits

NOTE: SAP Containers are reusable and property of the government. Continue to use the container and do not remove from unit location unless they are turned in to PPOC.

NOTE: SAP operations require annual training.

NOTE: If the unit is deployed for training or mobilized for a period greater than 10 days, the SAP must be closed by memo to the Environmental Division.

GENERAL INFORMATION

CBRNE kits not covered by this protocol, contact Environmental Division Hazardous Waste.

EQO Classes

- Shortened
 - Maximize classroom time
 - Increase Senior leadership attendance (Officer/NCO's)
 - Maximize Optempo
 - HAZCOM removed, safety function
- DTMS for unit class registration
